

# FORNAX

AURATON RT

## Heating Device Controller (Wireless Receiver)

The AURATON Fornax receiver is an actuator that directly cooperates with heating and air conditioning devices. With its ergonomic design and removable connection blocks, it is easy to install and connect to devices. Auraton Fornax is equipped with a service switch that allows the user to switch the receiver off at the touch of a button. Thanks to this switch, there is no need to change the parameters of the thermostat or physically disconnect the control cables in order to perform servicing operations.

Unique algorithm for saving the operating parameter of the receiver from the last 24 hours

Dedicated switch for easy servicing of the heating device

Removable connection terminals

Cooperation with heating or air conditioning devices

Controlling devices that require wet and dry contacts

## TECHNICAL DATA

Power supply	230 V AC, 50Hz, 1,5 W
Working temperature range	0°C – 45°C
Radio frequency	868,850 MHz; 869,000 MHz
Working range	in a typical building with a standard wall construction – approx. 30 m; in open space – up to 300 m
Working status signalling	LED diodes, sound signal
IP Rating	IP20
Humidity	≤85% non-condensing
Relay capacity	max. 250V AC, max. 16A
Suggested mounting place	near the boiler or the boiler pump
